

Cam Locks

Cobra 7 Tubular Cam Locks

The **Cobra 7** Series incorporates the original design of current tubular cam locks such as the ACE®, Gem® and others with our new and improved face and 7-Sided lock spindle and key.

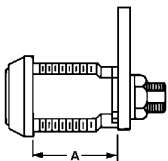

Cobra 7 Series

All **Cobra 7** cam locks come with our improved anti-drill ball positioned in the center of the spindle. We also incorporate a shielded pin stack that will protect the combination pins and a 7 sided spindle and 7 sided key to match. The **Cobra 7** keys are only available from Locking Systems or one of its service centers.

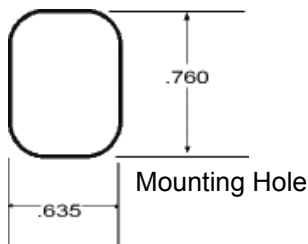

Cobra 7 cam locks are available with thousands of new combinations. A standard tubular key will NOT fit onto the **Cobra 7** lock, which increases the security level of these locks.

**Protected By
U.S. Patent**

Contact us to get additional information on this and other Cobra locks that can provide additional security at reasonable prices.

Part Number	"A" Dimension	Series
TF1038t-7	11mm (3/8")	Cobra 7 - Tapped End
